# AUTHOR INDEX

## VOLUME 27

### A

Adams, M. R., 241  
 Aliverti, V., 1231  
 Almeida, O.F.X., 1062  
 Alvarez, J. G., 1102  
 Amann, R. P., 723, 745  
 Amis, M. M., 665  
 Anderson, D. J., 104  
 Anderson, L. L., 79, 91, 815, 826  
 Anderson, R. A., Jr., 832  
 Anderson, W. R., 340  
 Armstrong, D. T., 840, 846  
 Asakawa, T., 118  
 Audhya, T. K., 1076  
 Ayalon, D., 223

### B

Baehler, E. A., 989  
 Bagnell, C. A., 903  
 Balerna, M., 159  
 Ball, G. D., 1190  
 Bambino, T. H., 1138  
 Bard, H., 320  
 Bardin, C. W., 755  
 Bariteau, F., 1084  
 Barracough, C. A., 268, 282  
 Bartke, A., 801  
 Batra, S. K., 1055  
 Bazer, F. W., 431, 925, 941, 957,  
 977, 1147, 1247  
 Beck, L. R., 915  
 Behrendt, M. D., 1196  
 Bernier, M., 616  
 Bittman, E. L., 580  
 Blake, C. A., 1159  
 Boice, M. L., 147  
 Bonanomi, L., 1231  
 Boshes, M., 411  
 Bousquet, D., 147  
 Bowen, R. A., 1196  
 Boyden, T. W., 652  
 Brackett, B. G., 147  
 Braw, R., 463  
 Brennecke, S. P., 1169  
 Bridson, W. E., 665  
 Britt, J. H., 70, 1126  
 Bronson, F., 1174  
 Brookbank, J. W., 941  
 Browning, J. Y., 665  
 Bryant-Greenwood, G. D., 673  
 Buhl, A. E., 183  
 Butcher, R. L., 29, 383, 449  
 Butler, W. R., 852, 863

### C

Campana, A., 159  
 Campbell, G. T., 169  
 Carter, D. B., 201  
 Castracane, V. D., 885  
 Cetta, F., 1216  
 Challis, J.R.G., 1, 1026  
 Chan, P. J., 118  
 Charpenet, G., 616  
 Clark, W. R., 1147  
 Clarkson, T. B., 241  
 Colenbrander, B., 556  
 Collins, D. C., 530  
 Collu, R., 616  
 Coniglio, J. G., 312  
 Coons, L. W., 440  
 Cordova, T., 223  
 Cornette, J. C., 183  
 Costoff, A., 903  
 Cox, N. M., 70, 1126  
 Critser, E. S., 1042  
 Croxatto, H. B., 12, 1033  
 Curl, J. S., 431

### D

Dailey, R. A., 624  
 Dallie, S. K., 890  
 Dawood, M. Y., 1207  
 Deaver, D. R., 624  
 De Kretser, D. M., 590  
 de la Cruz, J. L., 885  
 den Besten, D., 189, 1119  
 Diekman, M. A., 815, 826  
 Dipinto, M. N., 897  
 diZerega, G. S., 633  
 Dluzen, D. E., 456  
 Dominic, C. J., 351  
 Donawick, W. J., 147  
 Drago, F., 765  
 Dressel, M. A., 147  
 Drickamer, L. C., 596  
 Ducharme, J. R., 616  
 Dukelow, W. R., 118  
 Dunn, T. G., 300

### E

Edmonds, E. S., 890  
 Elaesser, F., 556  
 Elias, K. A., 1159  
 Eppenberger, U., 159  
 Eppig, J. J., 399  
 Erickson, G. F., 1267

Evans, C. A., 1  
 Evans, J. F., 147

### F

Fabbro, D., 159  
 Farookhi, R., 1261  
 Fawcett, D. W., 495  
 Felicio, L. S., 327  
 Ferin, M., 99  
 Finch, C. E., 327  
 First, N. L., 1194  
 Fitz, T. A., 703  
 Fitzgerald, J., 852, 863  
 Forcelledo, M. L., 1033  
 Ford, J. J., 425  
 Ford, S. P., 870, 877  
 Foster, D. L., 580  
 Fraser, H. M., 548  
 Fredericks, C. M., 340  
 French, L. R., 1042  
 Friesen, H. G., 407  
 Fuentealba, B., 12

### G

Garfield, R. E., 967  
 Geisert, R. D., 925, 941, 957  
 Ghosh, A., 1023  
 Giavini, E., 1231  
 Gibb, W., 320  
 Gibbons, W. E., 633  
 Gilliam, F. R., III, 641  
 Godkin, J. D., 977  
 Goetz, F. Wm., 1216  
 Goldbard, S. B., 419  
 Goldman, B. D., 801, 810  
 Goldsmith, L. T., 885  
 Goodman, A. L., 989  
 Goodman, R. L., 580  
 Goodpasture, J. C., 1076  
 Gordon, T. P., 530  
 Goy, R. W., 354  
 Gram, W. D., 369  
 Greenwald, G. S., 505, 1090  
 Gregerson, K. A., 169  
 Griswold, M. D., 211, 233  
 Grotjan, H. E., Jr., 110

 Zucker, I., 411

# SUBJECT INDEX

## VOLUME 27

### A

- Adrenal, activation in fetus by infusion of adrenocorticotropin (sheep), 1026
- Aging
  - estrous cycle frequency, length and vaginal cytology (mouse), 327
  - follicular and plasma patterns of steroids (rat), 383
  - importance of ovary and hypothalamus-pituitary in termination of estrous cyclic activity (rat), 29
  - norepinephrine and dopamine activity in microdissected brain areas (rat), 562
- Androgen biosynthesis, mechanism of glucocorticoid-induced suppression (rat), 1138
- Anestrus, concentrations of reproductive hormones (dog), 1196
- Antibodies, to antigens on tetatocarcinoma cells, association with parity (mouse), 104
- Arachidonic acid, metabolism in vitro by blastocysts and endometrium (cow), 431
- Atresia
  - effects of androgens (rat), 903
  - effects of sodium pentobarbital and bromocriptine (rat), 189

### B

- Biogenic amines, effects of dopamine, norepinephrine and serotonin on LH and prolactin (sheep), 624
- Blastocyst
  - cellular remodeling during pregnancy (pig), 941
  - interrelationships between preimplantation development and uterine endometrial secretions (pig), 925
  - metabolism of arachidonic acid in vitro (cow), 431
  - surface charge density during implantation (mouse), 485
  - synthesis and release of polypeptides during elongation and attachment (pig), 977

### C

- Cannabinoids, effects on follicular function (rat), 223
- Capacitation, inhibition by ethanol (mouse), 832
- Carnitine, induction of changes in metabolism of spermatozoa (ram), 735
- Catecholamines
  - activity in microdissected brain areas during aging (rat), 562
  - dynamics during delayed anovulatory syndrome (rat), 282
  - responses of hypothalamic neurons to estrogen following ovariectomy (rat), 268
- Cervix, localization of relaxin binding sites by autoradiography (rat), 673

- Circannual rhythms, plasma testosterone and LH levels (squirrel), 411
- Clomiphene, in vitro effects on follicles (rat), 463
- Conceptus, luteotropic and antiluteolytic activities (rabbit), 665
- Corpus luteum
  - characterization of two steroidogenic cell types (sheep), 703
  - influence of conceptus on maintenance of pregnancy (mouse), 1042
  - relationships between estrogen receptor and estradiol-stimulated progesterone synthesis (rabbit), 1049
  - synthesis of estrogen (ferret), 540
  - transplantation of granulosa cells, evidence for progesterone secretion (rat), 1261
- Cumulus oophorus, differential action of sulfated glycosaminoglycans on FSH-induced functions (mouse), 399

### D

- Delayed anovulatory syndrome, changes in plasma hormone profiles and in hypothalamic catecholamine turnover (rat), 282

### E

- Embryo
  - development affected by decreased ovarian tissue and maternal age (rat), 449
  - development from preimplantation to post-implantation stages in vitro (baboon), 915
  - genes affect timing of early development (mouse), 419
  - influence of estradiol and histamine on intrauterine migration (pig), 575
  - toxic effects of 5-hydroxytryptamine during peri-implantation period (rat), 1231
- Endometrium, metabolism of arachidonic acid in vitro (cow), 431
- $\beta$ -Endorphin, presence in male reproductive tract of five species (rat, mouse, hamster, guinea pig, rabbit), 755
- Epididymis
  - binding of 32K protein to spermatozoa (rat), 1239
  - changes in metabolism of spermatozoa during transit (ram), 735
  - effects of spironolactone on electrolyte and water content and male fertility (rat), 771
  - modification of sperm membranes (ram), 745
  - transport of 3-O-methyl-D-glucose, inositol and  $\alpha$ -aminoisobutyric acid across epithelia (rat), 1181
  - yield, characteristics, motility and cAMP content of sperm isolated from different regions (ram), 723

## Estrogen receptor

- level in oviduct during ovum transport (rat), 12
- variation in mammary gland and uterus at parturition (rat), 658

## Estrous cycle

- concentrations of reproductive hormones (dog), 1196
- effect of grouping and sex on regulation (rat), 1023
- follicular and plasma patterns of steroids (rat), 383
- frequency, length and vaginal cytology during aging (mouse), 327
- importance of ovary and hypothalamus-pituitary in termination of cyclic activity during aging (rat), 29
- pulsatile release of oxytocin (sheep), 1169

## F

- Fertility, effects of prolonged caging with fertile males on reproductive functions in aging females (rat), 609

## Fertilization, in vitro (cow), 147

## Fetus

- activation of adrenal function by infusion of adrenocorticotropin (sheep), 1026
- antiluteolytic and luteotropic properties (mouse), 1042
- characterization of specific steroid binding in amnion (human), 320
- development as related to maternal blood volume and uterine blood flow (pig), 79
- development in immature rats given superovulatory dose of PMSG (rat), 840
- differential rates of growth in two successive pregnancies (bat), 351
- effect of inanition on ornithine decarboxylase activity (pig), 91
- placental transport and distribution of uteroferrin (pig), 1247
- protein synthesis in differentiating female reproductive tract (mouse), 201

## Follicle

- alterations in steroid hormones during preovulatory period (sheep), 300
- androgen effects on atresia and ovulation (rat), 903
- characterization of granulosa cells by isopycnic gradient centrifugation (pig), 633
- development as related to GnRH and gonadotropins (pig), 70
- effect of cannabinoids on steroidogenesis (rat), 223
- effect of clomiphene citrate (rat), 463
- effect of prolactin on activity (rat), 1119
- mechanisms of suppression of development during lactation (rat), 1090
- morphological asymmetry of maturation (monkey), 989
- relationship of steroidogenesis to countercurrent transfer of testosterone from ovarian vein to artery (cow), 778

- Follicle-stimulating hormone (FSH), release by cultured anterior pituitary cells; effects of testosterone, dihydrotestosterone and progesterone (rat), 110

## G

- Germinal cells, effect of essential fatty acid deficiency on lipids (rat), 312
- Glycosaminoglycans, differential action on FSH-induced functions of cumuli oophori (mouse), 399
- Gonadotrophs, influence of LHRH, hypophysectomy and orchidectomy on differentiation in ectopic pituitary (hamster), 169
- Gonadotropin-releasing hormone (GnRH)
  - effect of pulsatile administration on endocrine changes associated with induction of fertile estrous (pig), 1126
  - relationships with gonadotropins and follicular development after weaning (pig), 70
- Gonadotropins
  - binding to ovary throughout estrous cycle (hamster), 505
  - induction of LH and FSH surges by progesterone, male (rat), 1222
  - levels in athymic males (mouse), 1267
  - relationships between basal secretion rates and serum concentrations during proestrus (rat), 1159
  - relationships with GnRH and follicular development after weaning (pig), 70
- Gossypol, effects on reproductive and endocrine functions in male (monkey), 241
- Granulosa cell
  - characterization by isopycnic gradient centrifugation (pig), 633
  - monolayer growth and differentiated function following cryopreservation (pig, rat), 641

## H

## Hibernation

- regulation by testis (hamster), 801
  - role of ovaries and of photoperiod (hamster), 810
- Hypothalamic-pituitary axis, functional dimorphism in prepubertal response to steroids (rat), 456

## Hypothalamus

- ability to release GnRH during lactation (rat), 125
- effect of deafferentation on LH secretion and seasonal breeding (sheep), 999
- failure of noradrenergic system to function after androgen sterilization (rat), 268

## I

## Implantation

- effect of estrogen (ferret), 540
- embryotoxic effects of 5-hydroxytryptamine (rat), 1231
- in immature rats given superovulatory dose of PMSG (rat), 840
- possible causes of failure following superovulation (rat), 846
- surface charge density, blastocysts (mouse), 485
- Inanition, effect on ornithine decarboxylase activity in maternal and fetal tissues (pig), 91

## L

Lactation, effect on hypothalamic responsiveness to electrochemical stimulation (rat), 125

## Leydig cell

effects of culture conditions on androgen production (mouse), 38

mechanism of glucocorticoid-induced suppression of androgen biosynthesis (rat), 1138

Luteinizing hormone (LH), effect of pulse frequency on seasonal variation in estradiol negative feedback (sheep), 580

## Luteinizing hormone releasing hormone (LHRH)

effect of immunoneutralization on estrogen-induced LH and FSH surges (sheep), 548

effect on LH and FSH (pig), 556

pituitary and ovarian receptors during estrous cycle, pregnancy and lactation (rat), 316  
receptors, modulation by steroids (rat), 133

## M

Melatonin, effect on hypothalamic-pituitary sensitivity to negative feedback effect of gonadal steroids (hamster), 602

Menstrual cycle, characteristics (monkey), 354

## O

Oocyte, in vitro maturation sequence and chromosomal normality (monkey), 118

## Ovary

binding of FSH, hCG and prolactin throughout estrous cycle (hamster), 505

blood flow during estrous cycle or early pregnancy (sheep), 877

recruitment of follicles in long-term hemicastrate (rat), 48

variation in steroids associated with mating (monkey), 530

## Oviduct

effects of ovulation on conduction and contraction velocities (rabbit), 440

electrical and mechanical activity in isolated smooth muscle (human), 393

nuclear estrogen receptor level during ovum transport (rat), 12

patterns of periovulatory motility and progesterone (rabbit), 340

Ovulation, ovarian and plasma prostaglandin levels (trout), 1216

Ovum transport, role of ovarian and adrenal progesterone (rat), 1033

## Oxytocin

fetal, role in parturition (rat), 362

pulsatile release during estrous cycle, pregnancy and parturition (sheep), 1169

## P

## Parturition

changes in hormone levels and gap junctions in uterus (rat), 967

estrogen and progesterone receptors in mammary gland and uterus (rat), 658

prostaglandins, steroids and gonadotropins (buffalo), 1055

pulsatile release of oxytocin (sheep), 1169

role of fetal oxytocin (rat), 362

## Photoperiod

effect on growth of reproductive organs and on pineal N-acetyltransferase (rat), 517

melatonin injections and steroid negative feedback (hamster), 602

ontogeny of gonadal response (hamster), 897

regulation of reproductive activity (ram), 1062

role in regulating hibernation, female (hamster), 810

short-day induced reproductive regression and spontaneous recrudescence (mouse), 369

Pineal, ontogeny of gonadal response to short photoperiod, blinding and melatonin (hamster), 897

Pituitary, determinants of gonadotroph differentiation (hamster), 169

## Placenta

changes during second half of pregnancy (hamster), 523

temporal concentrations of placental lactogen in peripheral circulation (rat), 407

transport and distribution of uteroferrin in fetus (pig), 1247

Placental lactogen, temporal concentrations in peripheral circulation (rat), 407

## Pregnancy

alterations in reproductive tissue prostaglandins (rat), 1207

cellular remodeling of blastocysts (pig), 941

changes in hormone levels and gap junctions in uterus (rat), 967

characterization of specific steroid binding in amnion (human), 320

endometrial secretory response to estradiol (pig), 957

evolution of reproductive mechanisms (bat), 681

interrelationships between preimplantation development of blastocyst and uterine endometrial secretions (pig), 925

luteotropic and antiluteolytic activities of conceptus (rabbit), 665

maintenance after ovariectomy with steroid analogs (rat), 261

placental and serum hormone changes (hamster), 523

prostanoid concentration in intrauterine tissue and fetal fluids (sheep) 1

pulsatile release of oxytocin (sheep), 1169

regulation of relaxin secretion (rat), 885

release of relaxin by prostaglandin (pig), 1190

role of developing conceptus in maintenance (mouse), 1042

## Progesterone

induction of gonadotropin surges in estrogen-primed castrated male (rat), 1222

secretion by transplanted luteinizing granulosa cells (rat), 1261

secretion stimulated by follicular fluid and effect of inhibiting de novo cholesterol synthesis (pig), 54

Progesterone receptor, variation in mammary gland and uterus at parturition (rat), 658

## Prolactin

effect on follicular activity (rat), 1119

- influence of duration of daylight on secretion (pig), 1084  
 regulation of secretion (monkey), 99
- prostaglandins  
 alterations with gestational age (rat), 1207  
 induction of decidualization (rat), 253
- prostanoids, changes in concentration during gestation (sheep), 1
- puberty  
 dietary and seasonal effects modulating LH secretion and first ovulation (sheep), 863  
 menstrual cycle (monkey), 354  
 seasonal effects and hormonal patterns (sheep), 852
- R**
- Relaxin  
 effects of steroids on secretion (rat), 885  
 localization of binding sites in uterus and cervix (rat), 673  
 release by nonluteolytic dose of prostaglandin during pregnancy (pig), 1190  
 tissue source during gestation (horse), 17
- S**
- Semen, cAMP-dependent protein kinases (human), 159
- Seminal plasma, properties of antifertility factor (human), 1076
- Sertoli cell  
 analysis of protein secretion by 2-D electrophoresis (rat), 233  
 effect of essential fatty acid deficiency on lipids (rat), 312  
 regulation of transferrin secretion in culture (rat), 211  
 RNA synthetic activities in vitro (rat), 374
- Sexual behavior  
 effect of aromatization of testosterone by adipose tissue on castrated male (rat), 765  
 endocrine control of female odors that elicit LH surges and attraction in males (mouse), 1174  
 reproductive capacity, artificial insemination and plasma testosterone levels of lean and obese males (rat), 890  
 variation in ovarian steroids associated with mating (monkey), 530
- Sexual differentiation  
 acceleration and delay via chemosignals; effect of circadian rhythm (mouse), 596  
 testicular control of defeminization (pig), 425
- Spermatozoa  
 binding of 32K epididymal protein (rat), 1239  
 changes in metabolism associated with epididymal transit or induced by carnitine (ram), 735  
 effect of spontaneous lipid peroxidation on motility (rabbit), 1102  
 inhibition of capacitation by ethanol (mouse), 832  
 interaction with serum complement components (rabbit), 473  
 modification of membranes during epididymal transit (ram), 745
- production of superoxide and activity of superoxide dismutase (rabbit), 1109  
 purification of autoantigens (rabbit), 713  
 role of immunoglobulin M in agglutination (bull), 62  
 yield, characteristics, motility and cAMP content in regions of epididymis (ram), 723
- Steroid receptors, quantification in pituitary and hypothalamus before, during and after treatment with PMS and hCG (pig), 815, 826
- T**
- Teratocarcinoma, antibodies to cell antigens associated with parity (mouse), 104
- Testis  
 effect of ethanol on hCG-stimulated testosterone response (dog), 652  
 effects of age and hormonal regulation on seminiferous tubule fluid and interstitial fluid production (rat), 590  
 localization of [<sup>3</sup>H]AF 1890 by freeze-drying autoradiography (rat), 495  
 role in regulating duration of hibernation (hamster), 801  
 stress-induced hyposensitivity to gonadotropin (rat), 616  
 transport of 3-O-methyl-D-glucose, inositol and  $\alpha$ -aminoisobutyric acid across epithelia (rat), 1181
- Testosterone  
 aromatization and male sexual behavior (rat), 765  
 countercurrent transfer from ovarian vein to artery and relationship to follicular steroidogenesis (cow), 778  
 effects after hypophysectomy on spermatogenesis, fertility and androgen concentrations in reproductive tract (rat), 183  
 levels in athymic male (mouse), 1267  
 relationship to pituitary-ovarian hormone secretion during estrous cycle (cow), 790
- Transferrin, regulation of secretion by cultured Sertoli cells (rat), 211
- U**
- Uterus  
 blood flow and maternal blood volume as related to fetal development (pig), 79  
 blood flow during estrous cycle or early pregnancy (sheep), 877  
 changes in hormone levels and gap junctions during pregnancy and parturition (rat), 967  
 deciduoma formation after ovariectomy (rat), 308  
 endometrial secretory response to estradiol (pig), 957  
 glucose, fructose, ascorbic acid and glucose phosphate isomerase activity during estrous cycle and early pregnancy (pig, horse), 1147  
 induction of decidualization by prostaglandins (rat), 253  
 influence of estradiol and histamine on embryo migration (pig), 575  
 interrelationships between preimplantation blastocyst development and endometrial secretions (pig), 925

localization of relaxin binding sites by autoradiography (rat), 673  
regulation of steroid receptor levels and peroxidase activity during the puerperium (rat), 1011

role of mast cells in decidualoma formation (mouse), 25  
steroid concentrations in lymph and arterial plasma during estrous cycle and early pregnancy (sheep), 870

# CONTENTS

## VOLUME 27

August 1982

|                                                                                                                                                                                                                        |    |                                                                                                                                                                                                                                                               |     |

# instructions to authors

*Biology of Reproduction* publishes, in English, papers concerned with reproductive biology. Submission of a manuscript to *Biology of Reproduction* involves assurance that no similar paper, other than an abstract or preliminary report, has been or will be published elsewhere. The Society for the Study of Reproduction does not require persons submitting papers to *Biology of Reproduction* to be members.

Manuscripts are refereed critically by two or more members of the Editorial Board or consultants. Acceptance of manuscripts is based on scientific content and presentation of the material. The Editors select the reviewers, correspond with the author, and make the final decision about the manuscript.

Send manuscripts in *triplicate* (one original and two copies), including all illustrative material, to:

Larry L. Ewing, Editor-in-Chief  
*Biology of Reproduction*  
Johns Hopkins University  
624 N. Broadway, Rm. 491  
Baltimore, MD 21205

It is requested that authors suggest the names and addresses of four potential reviewers.

**GENERAL INFORMATION.** There is no lower or upper limit to the length of a manuscript. The manuscript must be typewritten and double-spaced on one side of good quality, 8½" X 11" paper, with one-inch margins. The manuscript *must* have prenumbered lines in the margin to facilitate the task of the reviewers.

The manuscript should be arranged in the following order: *title page*; *abstract* (no more than 200–300 words); *introduction*; *materials and methods*; *results*; *discussion*; *acknowledgments*; *references*; *tables*; *figure legends*; and *illustrations* (line drawings and graphs, and continuous-tone prints).

**Title Page.** The *title page* should contain the name of the author(s), affiliation, telephone number, and a running page headline not to exceed 53 letters and spaces. Please indicate to whom correspondence and requests for reprints should be addressed.

**Materials and Methods.** The *materials and methods* section is most important and should provide the reader with all the information that will make it possible to repeat the work. For modification of published methodology, only the modification needs to be described.

**Results.** *Results* should be presented referring to tables, graphs and figures, but without discussion.

**Statistical Analysis.** *Statistical analysis* of the data using appropriate methods is a must.

**REFERENCES.** In the body of the paper refer to authors as follows: Doe and Smith (1972), or if the same authors have two papers in the same year: Doe and Smith (1972a,b). If more than two authors are cited in the text, use the name of the first author only: Doe et al. (1972).

*References* should be in *alphabetical* order as follows:

Davis, H. E. and Jones, B. A. (1978). Sea-

sonal variations in plasma hormones. *Biol. Reprod.* 88:271–275.

Jones, J. J. (1977). *Clinical Endocrinology*, vol. 3. Academic Press, New York.

Smith, M. B., Olsen, R. R. and Doe, J. H. (1972). Care of the neonate. In: *Size at Birth* (J. R. Jones, ed.). Plenum Publ., New York, pp. 352–358.

In the *reference* section it is proper to cite a paper that has been *accepted* for publication provided the year of publication and the name of the journal are given. No reference to *papers in preparation*, *unpublished data*, or *submitted for publication* will be permitted in the *reference* section, but will be permitted in the text.

**ABBREVIATIONS.** Abbreviations in the body of the paper should be used after having been initially explained. For example, *adrenocorticotrophic hormone (ACTH)*, *human chorionic gonadotropin (hCG)*, etc. Abbreviations that would be recognized by scientists outside your field can be used without definition, such as: ml, IU, i.v., g, etc.

The Society has decided against adopting the nomenclature for polypeptide hormones proposed by the Joint Commission on Biochemical Nomenclature. Therefore, only *follicle-stimulating hormone (FSH)* not *folliotropin*; *luteinizing hormone (LH)* not *lutropin*, etc. will be accepted. In papers in which the newly proposed nomenclature is used, it will be changed to presently accepted terminology.

**TABLES.** Tables should be as simple as possible. Each one should be typed on a separate sheet of paper and must include a heading. Explanatory matter should be in footnotes. Only in exceptional cases will the journal print tables lengthwise on a page.

**ILLUSTRATIONS.** Legends should be typed on a separate sheet of paper and numbers and letters should be consistent in style with those used in the illustration. Note the conventions for abbreviations used in the journal so that usage in illustrations and text will be consistent. Magnification in legends or reference bars on figures are required.

When revising a manuscript, mark *revised ms.* with soft pencil on the back of each illustration to avoid errors that can occur when figures have been deleted or their sequence changed.

Illustrations that are substandard will be returned, delaying publication.

**Line Drawings and Graphs.** One original (glossy prints or original artwork) should be submitted for reproduction, but photocopies are acceptable for the two review copies. Lines must be dark and sharply drawn. Solid black, white, or bold designs should be used for histograms because light stippling or gray tones may become *lost* in reproduction. Lettering and symbols *must* be large enough to remain legible if the line drawing must be reduced. Freestyle hand lettering or drawing is not acceptable.

**Continuous-Tone Prints.** Three sets of continuous-tone prints (photomicrographs, etc.) must be sub-
